TASKS

TASK 01	Plan Your Identity Structure	2 marks

Deployment plan

Naming conventions: I will be using a initial.lastname@domain.onmicrosoft.com format. Ideally only the last name would be necessary, however the initial is included to help differentiate between individuals with the same last name.

Group design:

Development: M365 Groups: allows for collaboration as well as access to sites like SharePoint

Operations: Security groups:used for granting access to resources such as SharePoint sites.

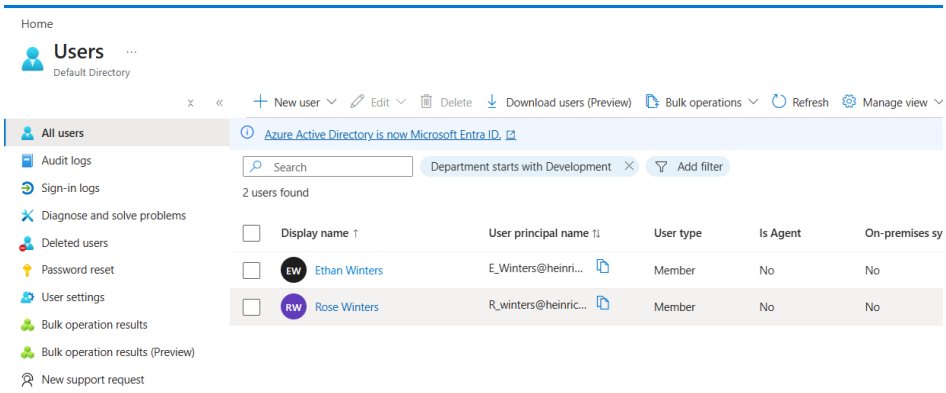
Finance: M365 Groups: allows for collaboration as well as access to sites like SharePoint

Principle of least privilege is a RBAC methodology that states the users should only receive the necessary privileges to complete their work and nothing more.

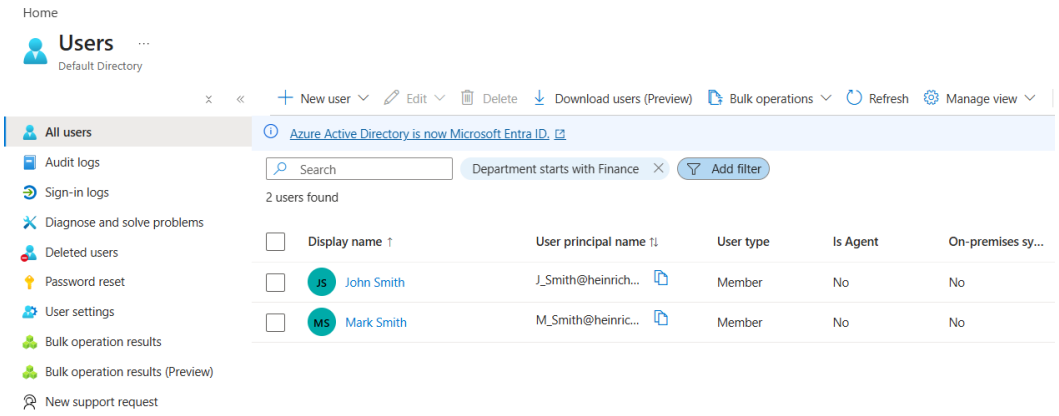
TASK 02	Create Users and Groups in Entra ID	3 marks

2a

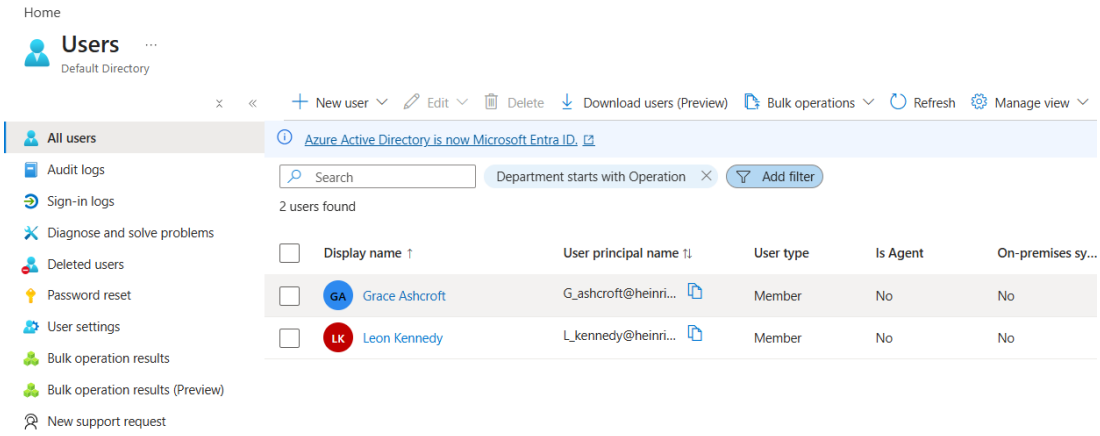
Development:



Finances:

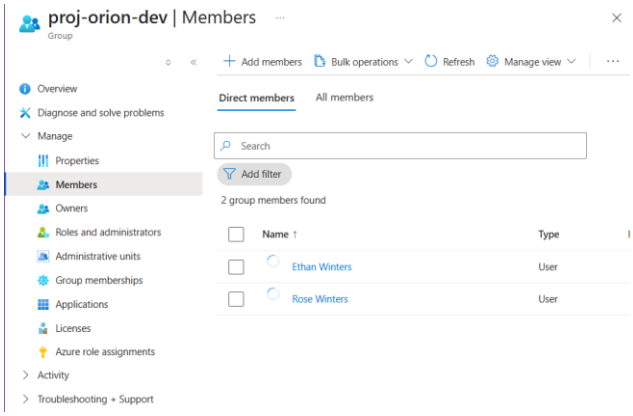


Operation:

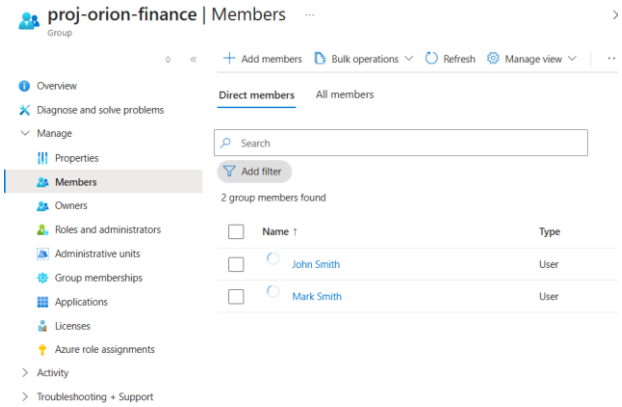


2b:

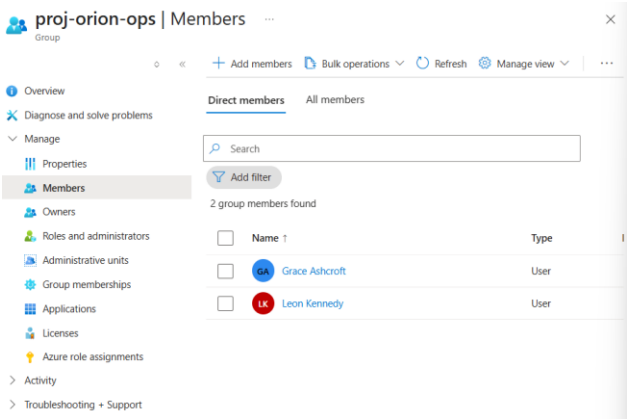
Development:



Finance:



Operation:



All membership types are assigned; this endures that all users are limited to their respective department and responsibilities However in a larger organization where individuals might to do work in multiple departments dynamic membership might be more appropriate.

To check group membership simply go to Groups < all groups < select your desired group < scroll down < select “view group members”

TASK 03	Assign Initial Roles	2 marks

Home > Resource Manager | Resource groups > CTO-20233279-RG | Access control (IAM) > Azure subscription 1 | Access control (IAM)

Role explanation:

Development: Development needs access to resources to complete their work, thus the contributor role is helpful to allow to them access to the resource they require

Operation: Operations is views all the resources to ensure that everything is running smoothly, they would report to administrators or development group in the event something is wrong.

Finance: They only need to see billing information thus they only have access to billing data

All these groups were assigned to the subscription level to ensure that they can work on all the parts that require their attention across the subscription. All the roles were also built-in roles s they fulfil the needs of the groups.
