Date: _____ 08/05/2026 _____

Task 2 – Define Business requirements for CTU Training Solutions

1. In South Africa, CTU Training Solutions operates as a private institution providing vocational and higher education programs within the field of skills development. Short courses, corporate training programs, internationally recognised credentials, and certificates are all on the menu. CTU is a medium-to large-sized educational institution that serves both traditional classroom settings and distance learning via its several campuses around the country. Enhancing employability and promoting workforce development in South Africa are its primary goals through equipping students and professionals with industry-specific information and practical skills.
2. For instructional and administrative activities, CTU Training Solutions needs safe, scalable, and dependable IT infrastructure. Students want 24/7 access to online learning systems, student portals, and cloud storage, while staff need secure communication, collaboration, and remote access capabilities. The company handles sensitive academic, financial, and personal data that must be protected and backed up. CTU needs cloud-hosted apps and infrastructure for numerous campuses, online learning, and growing operations. Microsoft Azure provides identity management, cloud storage, cybersecurity, virtual networking, and scalable application hosting for these organisations.
3. Microsoft Azure is better for scalability, flexibility, security, and cost than on-premises infrastructure for CTU Training Solutions. CTU uses Azure to manage campuses, e-learning platforms, remote access, and student enrolment without buying and maintaining expensive physical servers. Cloud services include automatic backups, disaster recovery, cybersecurity, and high system availability for sensitive student and business data. Azure technologies let staff and students collaborate more easily.
4. Compared to on-premises infrastructure, Microsoft Azure offers higher scalability, flexibility, security, and pricing for CTU Training Solutions. To avoid the high costs of purchasing and maintaining physical servers, CTU leverages Azure for campus management, e-learning platform administration, remote access, and student enrolment. For important company and student records, cloud services offer automated backups, disaster recovery, cybersecurity, and very high system availability. With Azure, faculty and students can work together more efficiently.
5. CTU Training Solutions expects many users to access the cloud on campuses and online. They comprise students, teachers, administrative, and IT staff. The number of concurrent users the Azure infrastructure must handle to enable reliable access to learning systems, communication tools, databases, and cloud apps depends on an organization's national footprint and staff size.

Azure Service	Purpose / Why you need it	Week it is used
Resource Group	Centralises CTU Azure resources	Week 1
Virtual Network (VNet)	Azure resources and manage network traffic	Week 2
Virtual Machine (VM – B1s)	Helps with applications, testing, and admin	Week 3
Microsoft Entra ID	Staff and student authentication and access control	Week 4
Network Security Group (NSG)	Network protecting inbound and outbound traffic	Week 5
Azure Storage Account	Securely keeps files, backups, student data, and project resources online	Week 6
Microsoft Defender for Cloud	Azure threat prevention monitors security issues	Week 7
Azure Monitor	tracks resource health, system performance, and availability	Week 8
Azure Cost Management	Manages Azure resource budgets and expenditures	Week 9

Screenshots

The screenshot shows the Microsoft Azure portal interface. The left sidebar contains navigation options like 'Home', 'Dashboard', 'All services', and 'FAVORITES'. The main content area is titled 'Resource Manager | Subscriptions' and shows a list of subscriptions. A table displays the following data:

Subscription name	Subscription ID	My role	Current cost	Secure S
Azure subscription 1	914ac7fd-7bfa-4f7a-9c7c-48a4630476f6	Owner	US\$1.71	31%

The screenshot shows the Microsoft Azure portal interface for a specific resource group. The left sidebar is the same as the previous screenshot. The main content area is titled 'CTU-20240476-RG' and shows the 'Overview' tab. It displays various details about the resource group, including its subscription, ID, location, and tags. A message at the bottom states: 'No resources match your filters. Try changing or clearing your filters.' Below this message are buttons for '+ Create' and 'Clear filters'.
