Azure Storage is a Microsoft-managed service providing cloud storage that is highly available, secure, durable, scalable, and redundant. Azure Storage includes Azure Blobs (objects), Azure Data Lake Storage Gen2, Azure Files, Azure Queues, and Azure Tables. The cost of your storage account depends on the usage and the options you choose below.

Access Permissions

In this screenshot you will be able to see the users added to one of the groups as well as the role that has been added to the users

The screenshot displays the 'Access Control (IAM)' page in the Azure portal. The page shows the 'Role assignments' tab for a subscription. At the top, there's a search bar and filters for 'Type', 'Role', 'Scope', and 'Group by'. Below this, a table lists the role assignments. The table has columns for 'Name', 'Type', 'Role', 'Scope', and 'Condition'. The assignments are grouped into 'Owner (2)', 'Security Admin (1)', and 'Storage Blob Data Contributor (2)'. Each group contains two entries, both assigned to 'Damian Butler'.
