

Week 8

I worked on managing the costs of my Azure environment. I had to stay within a limit of 100. I went to Azure Cost Management. Created a budget called Student-Budget-100. This budget was for my subscription. It was limited to 100 USD per month. I set up two alerts: one for when I spent 80% of my limit and another for when I spent 100% of my limit. I added my student email to get these alerts so I would know before I went over my limit. I took a picture of the budget settings to show the name, scope, amount and alerts. Then I looked at Cost Analysis to see what I was spending my money on. I wanted to know which resources were costing me the most. I wrote down the three things that were costing me money and tried to figure out why they were so expensive. I made some changes to reduce my costs like stopping my machine when I was not using it or making it smaller. I took pictures before. After I made the changes and guessed how much I would spend per month based on how I was using things.

Task 1

Create budget ...

Budget

Budget Details

Give your budget a unique name. Select the time window it analyzes during each evaluation period, its expiration date and the amount.

*Name	Student-Budget-101 		
*Reset period ⓘ	Monthly 		
*Creation date ⓘ	2026 	May 	1
*Expiration date ⓘ	2028 	April 	30 

Budget Amount

Give your budget amount threshold

Amount *	101 
----------	--
