Network Topology Diagram

IP Addressing Plan

Name	CIDR
VNet	22.0.0.0/18
Public Subnet	22.0.1.0/24
Private Subnet	22.0.2.0/24

NSG Rule Table

Rule Name	Protocol	Port	Direction	Action	Justification
Allow HTTP	TCP	80	Inbound	Allow	Enables website traffic
Allow HTTPS	TCP	443	Inbound	Allow	Secure web access
Deny all Inbound	Any	*	Inbound	Deny	Prevent unauthorized access

Challenges Encountered

I would say this Practical went well except for when I had to add the NSG with the proper virtual network subnet, that was tricky. I figured out how to attach the NSG to the public subnet after reviewing the subnet setup settings.

Secondly, when I was organising and displaying screenshots in the GitHub README, this was challenging for I had never done it before. My incorrect file naming and pathology errors stopped photos from loading. I resolved the issue by changing markdown syntax URLs and renaming screenshot files to lowercase.
