

NET731 Week 9 – Azure Environment Architecture

Student Name: Pheny Tshifhenye
Student Number: 20231149
Module: NET731 Cloud Networkin.

Project Overview

During the practical series I built and configured an Azure environment that includes:

- a resource group,
- a virtual network with three subnets,
- a network security group,
- an Ubuntu virtual machine,
- a storage account and blob container,
- RBAC permissions,
- Azure Monitor metrics and alerts,
- a Log Analytics Workspace,
- and Azure Cost Management controls.
