Expiration date	29/02/2028

Budget alerts

Alert conditions	Type	% of budget	Amount	Action group	Action group type
	Forecasted cost	25%	US\$13	None	
	Forecasted cost	50%	US\$25	None	
	Forecasted cost	75%	US\$38	None	
	Forecasted cost	100%	US\$50	None	
	Actual cost	100%	US\$50	None	

This is my budgets account that I used for the Entire project, As I was using my personal account I wanted to use as little credit as possible, I was willing to pay up to 50\$ of my own money but That was luckily not needed. There is a total of 5 thresholds namely when the budget is forecasted to reach 25%, 50%, 75% and 100% with an additional threshold of 100% actual cost. This is to give periodic reminders of how much of the budget has been spent.

Task 2: Monitor Usage and Adjust Resource Settings

Virtual machines are my highest costing resource, There isn't any particular way to affect this analysis as all resource that could incur costs have pre-emptively been stopped or deleted.
